

Agile Coaching

Expertly guiding organizations in pursuit of business agility

Every government program and Agile transformation is different. We move beyond the prescriptive to understand your needs and your mission and craft an implementation that's right for you. Whether you're just getting started or struggling with your current transformation journey, let our world-class experts help you integrate Agile methods into your organization. Our coaching and consulting services include:

- SAFe® Implementations
- Agile Transformations/Change Agency
- Lean-Agile Centers of Excellence (LACE)
- Scrum Master Resourcing
- Agile Coach Resourcing
- Agile Training and Development
- Ways of Working and Context Analysis Consulting
- Workflow, ALM tools, and Roadmaps
- Government ALM tools, including DI2E within DoD environments (that is, Government-approved Clouds)
- Communities of Practice and Coaching Dojos
- Value Stream Mapping
- Lean Portfolio Management
- Inspect and Adapt Problem-Solving Workshops

SAFe® Training

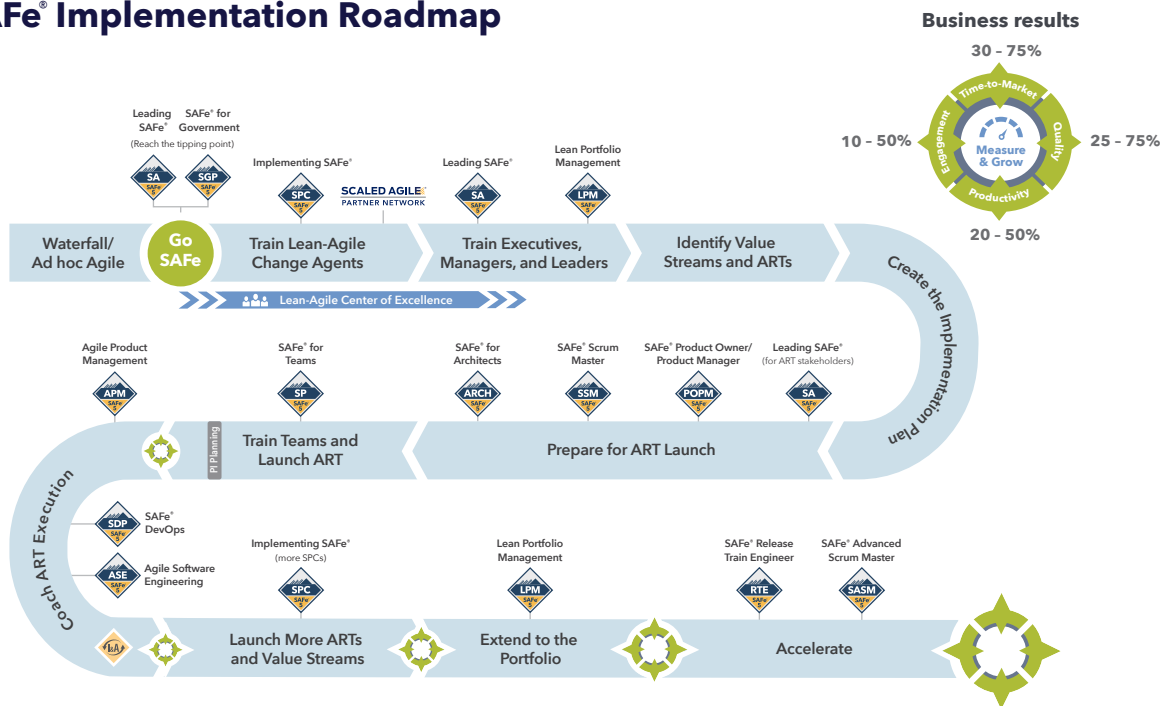

Cultivating tomorrow's Lean-Agile leaders today

Why Train with BigBear.ai?

We understand that transformation is hard. We know that SAFe seems intimidating. We appreciate that your organization has unique needs and unique problems. And, we recognize that you have a choice when it comes to Lean-Agile training. We believe you are making the right choice with us. You get a lot more from us than you do from our competitors. This is the BigBear.ai Agile Training Advantage, which includes:

- At least two certified and experienced instructors for every class.
- Printed and digital student workbooks to suit your learning style.
- Half-day sessions for balance between work and learning.
- Instructor-developed knowledge checks to reinforce content.
- Instructional adjustments based on daily student feedback.
- One 2-hour post-training certification exam coaching session to support your study and boost your confidence.
- Supplemental handouts to support learning, certification, and post-training implementation.

SAFe® Implementation Roadmap

PI Planning Support

BigBear.ai offers full-service PI Planning for Controlled Unclassified Information. Clients have the choice of full-service planning or we can tailor our service selections to fit their needs by picking from the available options below:

- Customize and configure the piplanning app within a government secured cloud environment, accessible with a Common Access Card (CAC) or External Certification Authority (ECA) via a secure network connection for Controlled Unclassified Information (CUI).
- Grant guest access to our private Microsoft Teams instance for use as the videoconferencing tool for your event or you may use the videoconferencing tool of your choice (e.g. Zoom).
- Setup of your videoconferencing tool, invite attendees to your event, conduct QA checks, and provide Tech Support for all bundled services throughout the PI Planning event.
- Deliver a proprietary piplanning app Fundamentals & Advanced Concepts course to thoroughly train attendees on how to use the app.
- Provide coaching services and SAFe® Training courses to help facilitate your event.

Remote PI Planning

When in-person PI Planning isn't possible, we can facilitate the same level of collaboration in a fully-remote environment. Utilizing the "piplanning app" in a secure government cloud, BigBear.ai can provide the tools and support necessary to make your transition to SAFe® smooth and effortless. The "piplanning app" is compatible with Jira, Azure DevOps, and Rally.

Simple Status Tracker (SST)

SST is a Jira plug-in that provides simple, yet powerful visualization of issue hierarchy. How close is that project to release? When will that new feature be done? Simple Status Tracker answers those questions quickly through intuitive visualization. BigBear.ai's Simple Status Tracker for Jira is now available for FREE in DI2E or can be purchased in the Atlassian Marketplace!

What Our Customers Are Saying

"Hands down, the best virtual training experience I've ever had!"

"Thanks for your great instruction and support! I passed my LPM exam!"

"I successfully passed my certification exam on the first attempt! BigBear.ai was instrumental to my success!"
